[Reg:] - Cheats and Cheat Codes Game Modes/Multiplayer Multiplayer v1.0 Help! I was in the middle of a fight and when the server crashed my client was gone. Can you or some one else reupload it? Infinite Money System File Type : EXE Used game mode? Supported Software Demos/Screens/Walkthroughs Demos Screens Walkthroughs Cheats TODO Features Anti-Ban System Server Browser Demo Recording System WIP What does this mean? Tell us if this game is broken or has issues: Do you need this game to play it perfectly? What do you think about this game? Rate this game: If you are having problems loading this game, create an account and post a screenshot: Good luck with that I've tried it on a couple of systems, an earlier build had the same problem, but was fixed in a later version. It seems to work fine with the Steam version though. The Demo recording is an interesting idea, as is the server browser. The Support Page should include a list of all the known issues (and bugs) in the game. The Download Page should have more info about the game. Thanks for the feedback. It seems like there were a lot of changes made to the client since the last version. We might not have fixed all the possible issues we could have, but we're trying to do our best to make a great game. A lot of these issues were fixed, and many of the game-breaking issues we had before are fixed now (mostly with the fixes to draw sorting). We're still working on optimization (look for specific problems with hl2 and hl3), and there's still some new issues we have to figure out (replay system coming up next!). I'm glad to hear you're enjoying the game. 82157476af
